

Forming Metals *and Relationships*

---

## **Reach Declaration of Conformity**

Based on information provided by our suppliers, or by review of the product composition, This Winco Stamping statement is based on the June 27, 2018 revision of the European Chemical Agency's 191 substance candidate list for authorization. Winco's steel products do not contain any of the listed substances at other than trace concentrations below the 0.1 weight % declaration limit.

## **RoHS Certification of Conformance**

Based on information provided by our suppliers, or by review of the product composition, Winco Stamping designates the product (s) listed below as RoHS compliant, according to Directive 2015/863. In addition, none of our processes would allow for the intentional addition of these restricted substances.

The maximum concentration values used in determining RoHS compliance are:

**Lead (Pb):** < 1000 ppm

**Mercury (Hg):** < 100 ppm

**Cadmium (Cd):** < 100 ppm

**Hexavalent Chromium: (Cr VI)** < 1000 ppm

**Polybrominated Biphenyls (PBB):** < 1000 ppm

**Polybrominated Diphenyl Ethers (PBDE):** < 1000 ppm

**Bis(2-Ethylhexyl) phthalate (DEHP):** < 1000 ppm

**Benzyl butyl phthalate (BBP):** < 1000 ppm

**Dibutyl phthalate (DBP):** < 1000 ppm

**Diisobutyl phthalate (DIBP):** < 1000 ppm

\* Note: the following maximum limits by weight apply for lead used as an alloying element:

In Steel	0.35% by weight
In aluminum	0.40% by weight
In Copper alloys	4.00% by weight
